1. Software

Data Analysis

- **PI/FR/DE:**
 - dataprep
 - sentiment
 - lang dependent (wiki, mps, ...)
- **GENERAL:**
 - LLM evaluation vs goldens

Data Management

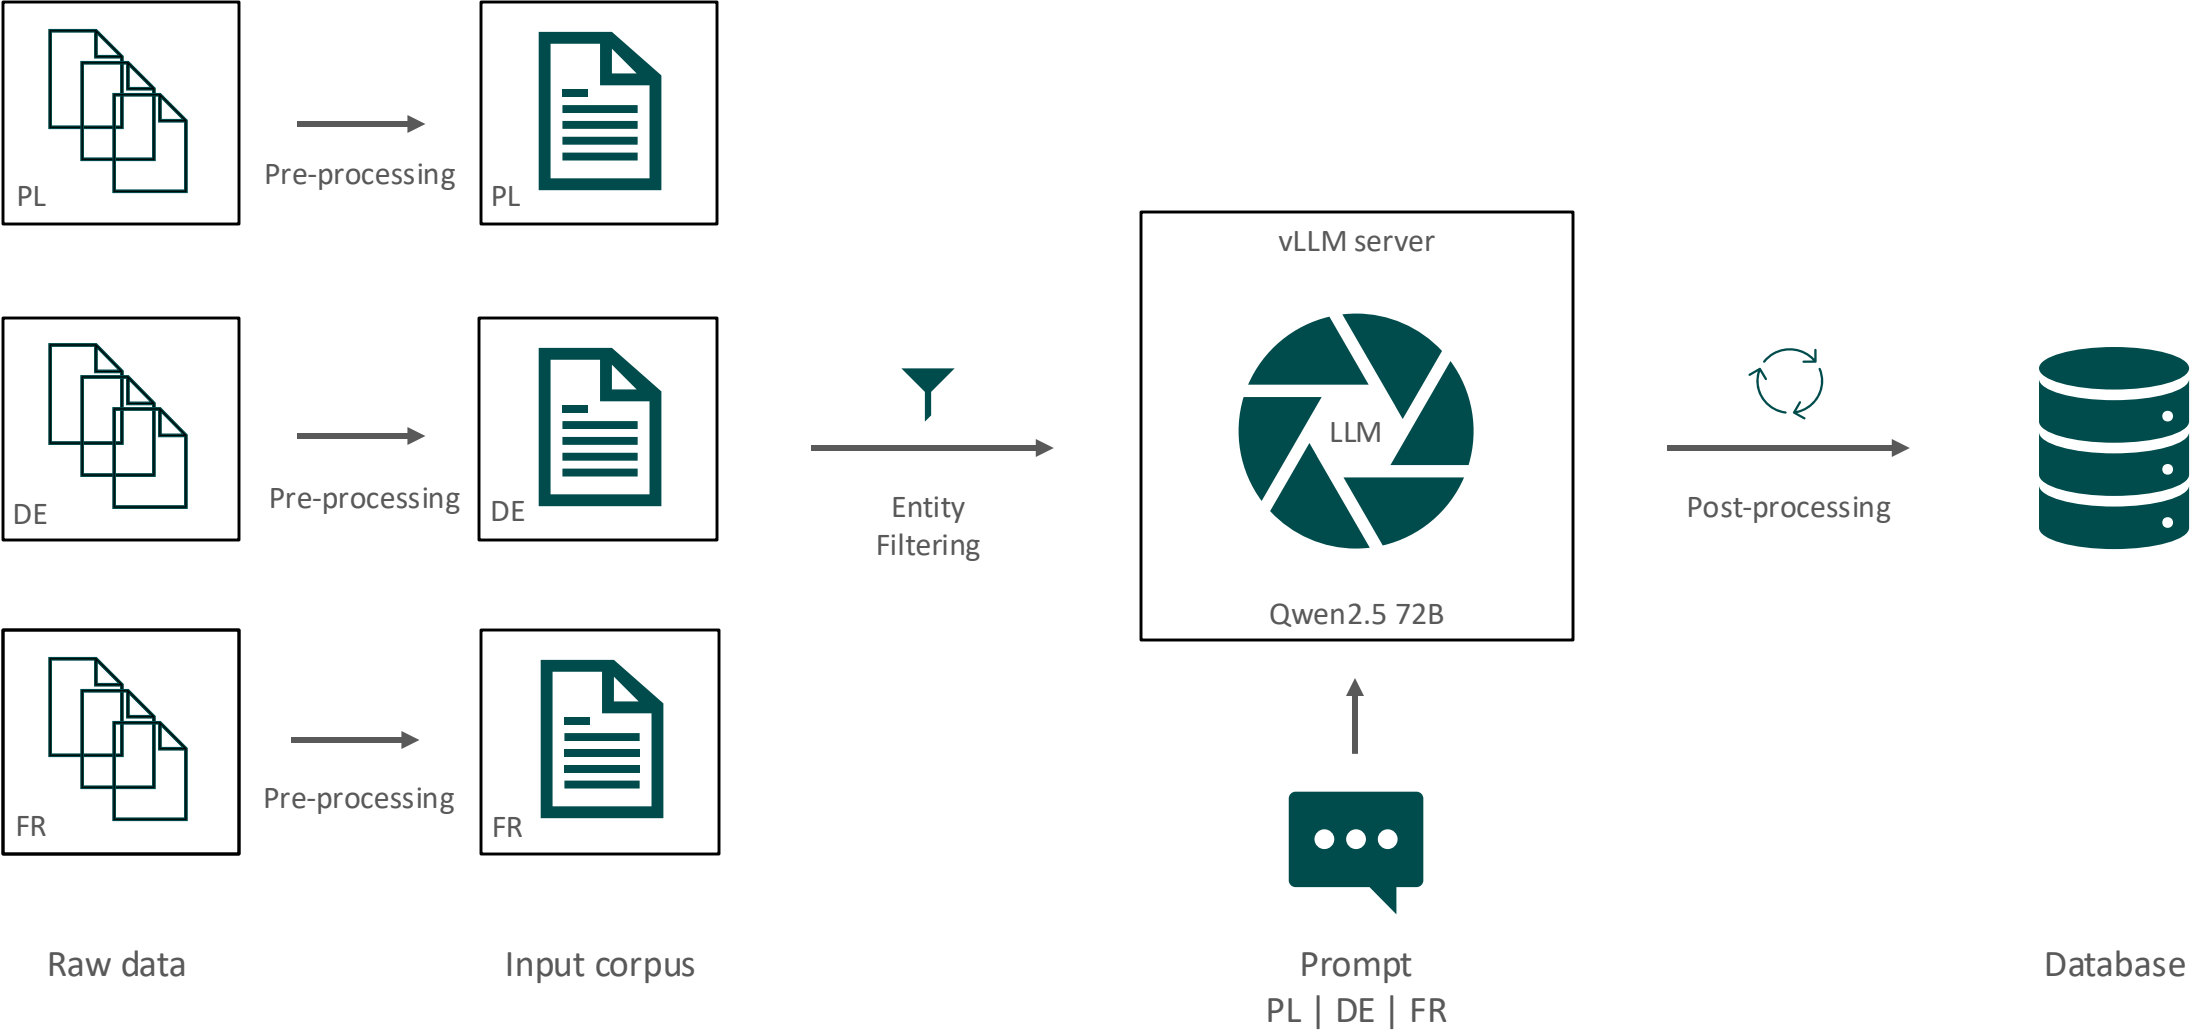

- **API:**
 - genai:
 - genai (GPT, vLLM, Ollama)
 - system prompts
 - retrieval:
 - pl
 - Wikidata
- **Non-API:**
 - pl
 - de
 - fr
 - general
 - evaluation
 - paths & storage
 - networks – future 😊

Data Repository

- **INPUTS:**
 - pl/de/fr:
 - raw (raw data)
 - ready (input corpus, goldens)
- **OUTPUTS:**
 - pl/de/fr:
 - database
- **NETWORKS:**
 - pl/de/fr:
 - future 😊

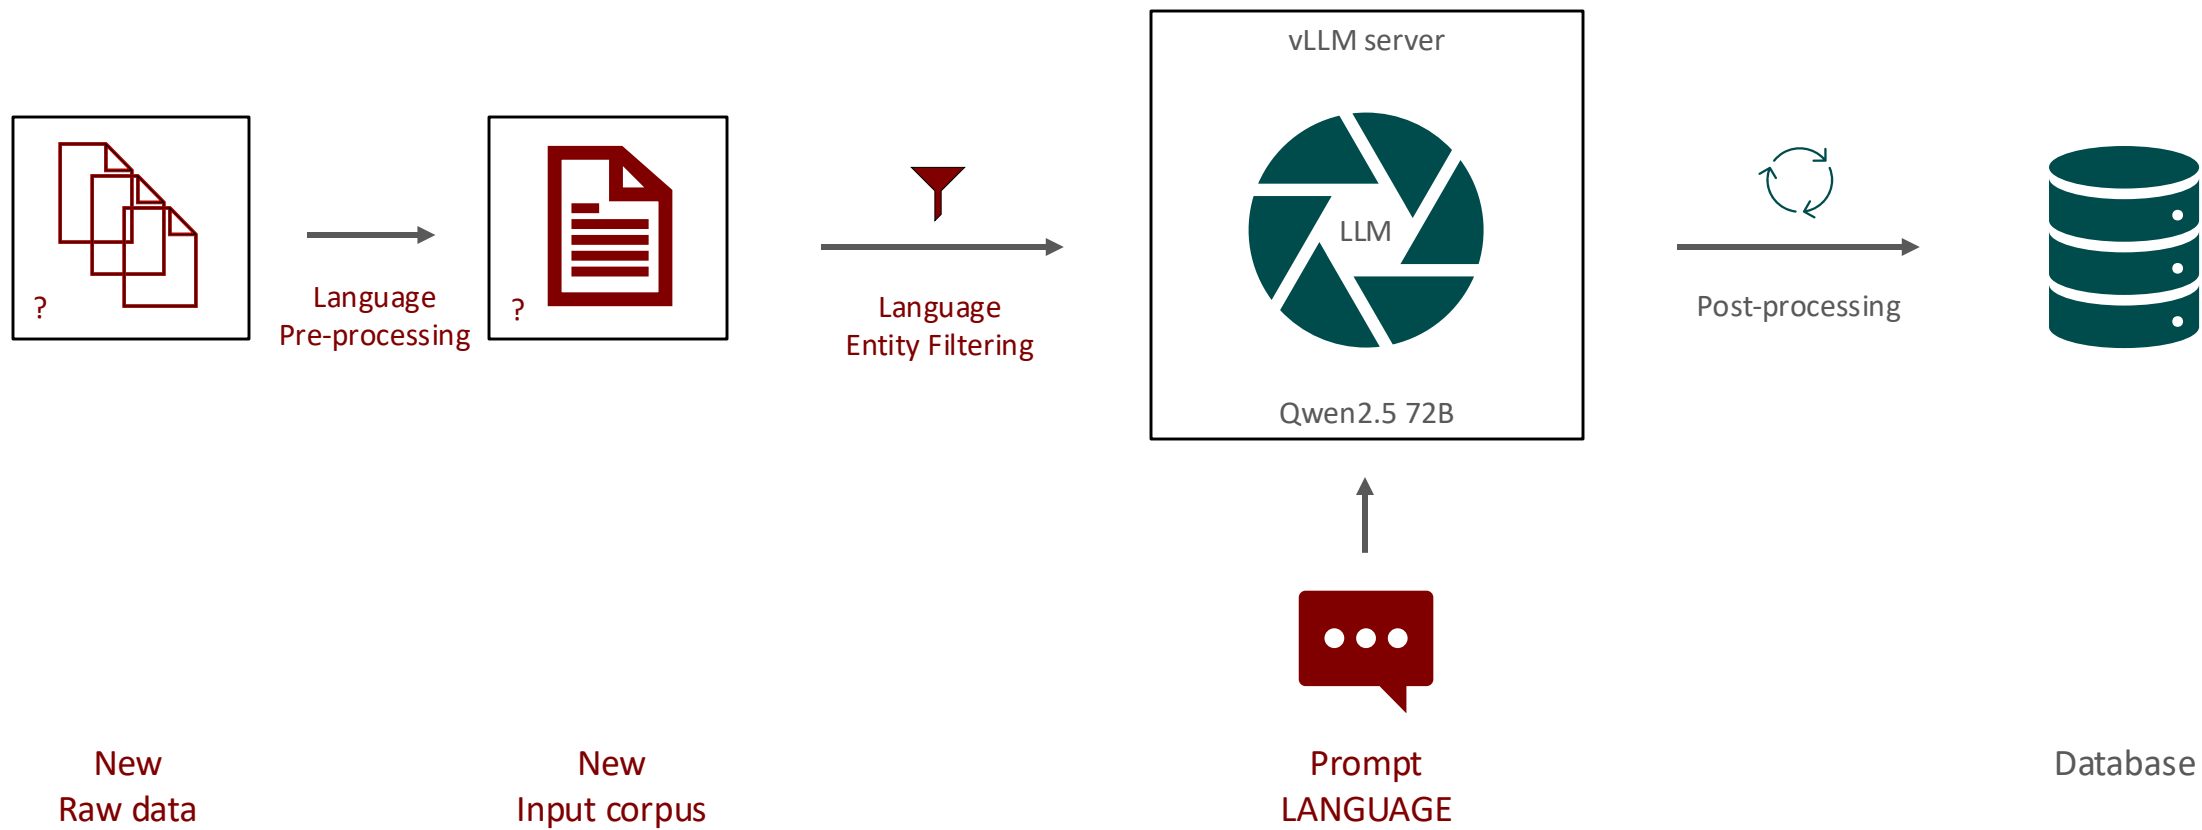

2. Use case

3. Scalability

Scenario: ANOTHER LANGUAGE

4. Database format

relation
*relation_id - speech_id - source_id - target_id - target_status - target_role - target_stance - predicate

speech
*speech_id - speech_text - speech_date - speaker_id - country_id - term

party
*party_id - acronym - name - mandates - wiki_url - country_id

country
*country_id - name - parliament_name - seats

politician
*mp_id - first_name - last_name - birth_date - birth_place - education_level - school - academic_title - profession - languages - seniority - country_id

mandate
*mp_id *term - party_id - club - list - constituency - committees - mandate_start - mandate_end - election_date - votes - source_url - country_id

5. Example

politician

mp_id	first_name	last_name	birth_date	name	birth_place	education_level	school	academic_title	profession	languages	seniority
465	Magdalena	Filipek-Sobczak	07-09-1983	Magdalena Filipek-Sobczak	Lublin	wyższe	Uniwersytet Marii Curie-Skłodowskiej w Lublinie, Wydział Humanistyczny, Kulturoznawstwo - magister (2007)Uniwersytet Marii Curie-Skłodowskiej w Lublinie, Wydział	NaN	prawnik	NaN	brak

mandate

term	party	club	list	constituency	committees	subcommittees	mandate_start	mandate_end	election_date	votes	source_url	mp_id
1	Porozumienie Centrum	Parlamentarny Klub Porozumienia Centrum	Porozumienie Obywatelskie Centrum	01 Warszawa	NaN	NaN	NaN	NaN	NaN	NaN	...	785
10	NaN	Klub Parlamentarny Prawo i Sprawiedliwość	Prawo i Sprawiedliwość	6 Lublin	[]	NaN	13-11-2023	NaN	15-10-2023	10480	https://www.sejm.gov.pl/Sejm10.nsf/po sel.xsp?id=078&type=A	465

speech

speech_id	term	speech_date	speech_text	speaker_id	country_id
666	10	05.12.2025	Mr. Speaker, Honorable Members of the House! We have a German prime minister in the Polish government, who traveled to the German capital to announce to Chancellor Merz that if Berlin fails to pay reparations for German crimes, Poland will consider doing so on Germany's behalf. Yes, the Polish prime minister announced in Berlin that Polish taxpayers could pay for what the German state bears full responsibility for. One can have different views, one can argue about history, but one thing is indisputable: no prime minister of the Republic of Poland has the right to relieve Germany of responsibility for its own crimes. This constitutes a political subordination of Polish interests to those of Berlin. The prime minister's behavior during this visit, concessive, even submissive, raises a legitimate question: Who does Donald Tusk represent: the Polish nation or the political expectations of the German government? (...)	465	2

relation

relation_id	speech_id	source_id	target_id	target_status	target_stance	target_role	predicate
1	666	465	2115	insider	negative	premier	traveled to Berlin to announce potential Polish actions regarding German reparations; speaker criticizes his subservient behavior and questions whose interests he represents; speaker accuses him of undermining Polish interests and failing to demand reparations firmly
2	666	465	Merz	outsider	neutral	kancelarz	was present during the announcement of potential Polish actions regarding German reparations

6. Data Quality Assurance

$$NER\ Recall = \frac{\sum_{d=1}^D found_d}{\sum_{d=1}^D golden_d}$$

$$TSA\ Score = \frac{1}{N} \sum_{d=1}^N \frac{1}{P_d} \sum_{e \in P_d} \left(1 - \frac{|s_e^{gold} - s_e^{pred}|}{2} \right)$$

$$Pipeline\ Score = NER\ Recall \cdot TSA\ Score$$

ner_recall	ner_recall_ci	tsa_score	tsa_score_ci	pipeline_score	n_docs	n_golden	n_found
0.91	(0.86, 0.95)	0.85	(0.79, 0.9)	0.77	49	139	127

Example for smaller PL golden set (n = 49) using:

- NER Recall: Wilson Confidence Interval (95%)
- TSA Score: Bootstrap Confidence Interval (95%)

Desired volume:

- n = 200 per language (evenly distributed across terms) – manually checked
- benefits: bigger statistical population & narrower CIs

7. Project status

#	Task	Deadline	Responsible	Status
1	Codebase for entire project	N/A	Kamil	Done
2	3 GS datasets created for all languages	N/A	Everyone	Done
3	Polish prompt for TSR	N/A	Kamil	Done
4	Defined metrics for performance checking	N/A	Kamil	Done
5	Disambiguation of Polish MPs	N/A	Kamil	Done
6	Algorithm for performance metrics on goldens	N/A	Kamil	Done
7	Algorithm for filtering Polish speeches	13.04	Kamil	Done
8	Contacting Polish group regarding corpus license	13.04	Kamil	Done
9	Algorithm for predicate compliance eval (cos sim)	17.04	Kamil	Done
10	German prompt development for TSR	EoM	Nina	In progress
11	French prompt development for TSR	EoM	Vincent	In progress
12	Evaluate synthetic data (synthtexteval)	17.04?	Vincent / Nina	In progress
13	Generating synthetic data (FR/DE/PL) -> Labelling real data for bigger goldens	27.04?	Everyone	In progress
14	Retrieve data from ParisParl	EoM	Nina	Pending
15	Process ParisParl	EoM	Vincent	Pending
16	Evaluate prompts on synthetic data	27.04?	Everyone	Pending
17	Process data	EoM & May	Kamil	Pending
18	Post-processing	May	Kamil	Pending
